SKILLS

Frontend

Angular · Signals · Standalone APIs · TypeScript · JavaScript · HTML / CSS · Tailwind CSS · PrimeNG · Highcharts · React

Mobile

Flutter · Kotlin

Backend & Integration

REST APIs · Spring Boot · MongoDB · Keycloak · Camunda BPMN · Laravel · Django · PHP

Performance & QA

JMeter · Load / Stress / Spike · Endurance testing · Lighthouse

Business Intelligence

Power BI · DAX · OData · Star-schema modeling

Tools

Git · Linux · Odoo

EDUCATION

BSc Software Engineering
Makerere University · 2021 – 2026

UACE & UCE (A-Level & O-Level)
St. James Biina SS

LANGUAGES

English · Luganda

PROFILE

Frontend developer specialising in **Angular**, with hands-on experience delivering production applications for property management, SACCO/financial-inclusion, grants-management and business-intelligence clients. Comfortable across the stack — wiring frontends to **Spring Boot, MongoDB, Keycloak and Camunda** back ends — and bring a quality mindset through **JMeter performance testing**, Lighthouse audits and **Power BI** reporting. BSc Software Engineering, Makerere University.

EXPERIENCE

Frontend Developer
Nov 2025 – Present
Omni Software Limited · Kampala

- Build and maintain Angular (standalone + signals) frontends for multiple client platforms on the Omnitech gateway — including the **Amaka Trust** property management system, **KengaMIS/SNV** grantee dashboards, **Sacco Wave** and **ABIFMS**.
- Integrate and troubleshoot Spring Boot / MongoDB services, Keycloak authentication and Camunda BPMN workflows end to end.
- Work with **MongoDB** collections and JSON schema validators — designing collection structures, resolving validation errors and importing programme data from Excel into structured collections.
- Plan and run JMeter load, stress, spike and endurance tests on Sacco Wave; translate results into formal optimisation reports for the engineering team.
- Design Power BI dashboards — including the **Heifer Uganda Country Dashboard** — using OData feeds and star-schema data models.

Frontend & Backend Developer
Apr 2025 – Oct 2025
Haraka Solutions Limited

- Developed full-stack web features in HTML, CSS, JavaScript and PHP across the full software development life cycle.
- Built a cross-platform mobile application in Flutter.

Frontend Developer Intern (React)
Apr 2025 – Jul 2025
Feyti Medical Group

- Built and maintained React frontend features and supported related backend work.

Frontend Developer Intern
May 2024 – Jul 2024
Cognosphere Dynamics Ltd

- Built responsive websites with HTML, CSS, JavaScript and Bootstrap, using Git for version control.
- Integrated Laravel REST APIs into client-facing pages.

EARLIER EXPERIENCE

Frontend Developer & Secretary
2024
Zahreen Limited

Supported web frontend work alongside administrative duties.

IT Intern
Sep – Nov 2023
Kola Technologies

Hands-on experience with Linux systems and Odoo ERP.

LEADERSHIP & ACTIVITIES

- **Code Queen Hackathon** (Apr – Jun 2023) — completed a three-month programme building practical HTML, CSS and JavaScript projects.
- **Impact Week** — design-thinking programme: ideation, rapid prototyping and decision-making in cross-functional teams.
